

Jabber Installation Guide

Installing Jabber on the Mac

The Cisco Jabber app allows you to make and receive calls on your Mac.

Step-by-Step Installation Instructions

1 Download the [Cisco Jabber for Mac](#) installation program

Important: You may receive informational notices and warnings from Google about the download. These are standard. **Continue** to download anyway.

2 Click **open** or **double-click** the downloaded **CiscoJabberSetup-Mac.pkg** file to start the installation.

Important: Local administrator rights are required to install Jabber.

Contact the help desk, 480-731-8632, for assistance if you **cannot self-install** Jabber.

3 Click **Continue** on the Welcome screen to begin.

4 Read the notices and disclaimers and click **Continue**.

5 Read the license agreement if desired. Click **Agree** to continue.

6 Click **Install** to begin the Jabber installation.

7 At this prompt, enter your local administrator account and password on the Mac. Click **Install Software**.

8 Please **wait** until the Jabber installation completes.

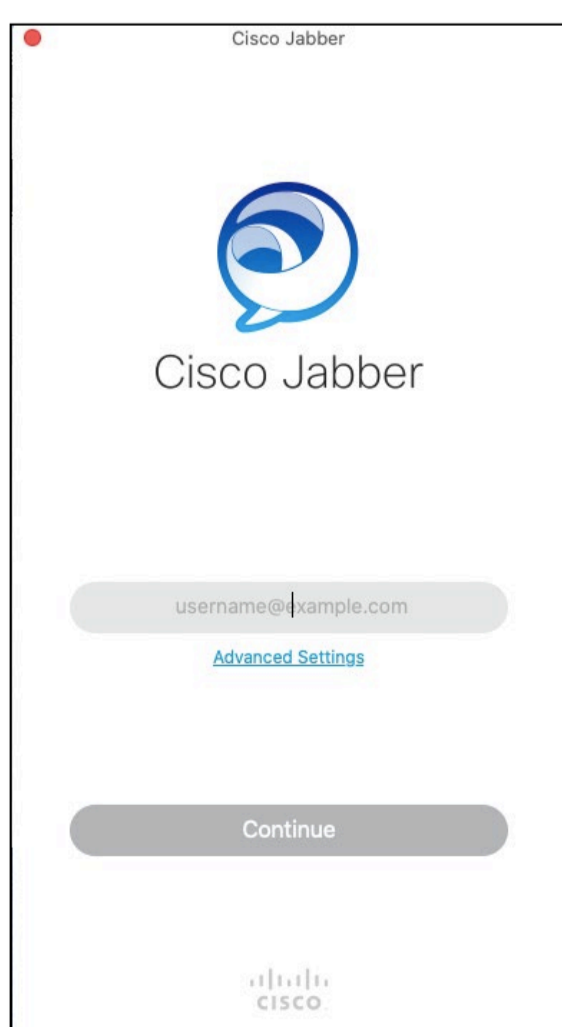

9 Click **Close** when the Jabber installation finishes.

- 10** **Signing in to Jabber**
After Jabber opens, a sign-in screen appears, enter your ID in this format, **MEID@maricopa.edu**. Click **Continue**.

11 **Signing in to Jabber – Initial Setup**
If/when the **second** sign-in screen appears, enter only your **MEID** and **password**. Click **login**.

Jabber will sign you in at that point.
